

This Workgroup is intended for Workboat Association members to be able to share interest and opportunities in relation to technology developments and advancements, environmental impact and vessel sustainability, and to proactively guide the supply chain.

This is a 'non-competition' industry meeting which is open and transparent and will not include any commercial discussions.

Identifying lessons learned, continually promoting vessel construction and design improvements as previously described and developing technical industry advancement is the fundamental purpose of the group.

The 2025 Workgroup structure was agreed at the 2024 AGM Technical Workgroup to be:

- *Four Technical Workgroups during the year*
 - *Q1 – Online, February*
 - *Q2 - In person, SEAWORKS June 10-12.*
 - *Q3 – Online, early September*
 - *Q4 – In person at the AGM*

The Chairman of the Workgroup for 2025 is Andy Page, the Chairman will steer the agenda and make decisions regarding the Workgroup's outputs and effectiveness on behalf of its attendees.

Particular themes may be chosen and the Workgroup may invite speakers or relevant presentations and workshops/ training as they see fit.

2025 will see the introduction of Co-Chair's to assist Andy Page in running the Workgroup. Co-Chairs will act as topic experts to help prepare and steer individual meeting agendas/delivery.
